

CONTENTS

Preface	13
I. C. Kiricuta	
Conformal Radiotherapy and Intensity-Modulated Radiotherapy Tumor Control and Better Survival	17
E. Eschwège and M. Tubiana/Villejuif	
Target Volume and Margin Definition: ICRU 50 and 62	23
T. Landberg/Malmö	
The Lymphatic System and Target Volume Definition	31
Th. Feyerabend and E. Richter/Lübeck	
The TNM System - Rules from the Pathologist	43
Ch. Wittekind/Leipzig	
Selection and Delineation of Target Volumes in Head and Neck Cancers Proposals for Standardizing Terminology Based on Surgical Experience	51
V. Grégoire, E. Coche, G. Cosnard, M. Hamoir and H. Reychler/Brussels	
Conformal Radiotherapy for Head and Neck Cancer Problems and Principal Solutions	69
K. Bratengeier/Würzburg	
Head and Neck Cancer The Standard-Irradiation Technique	83
U. Götz and I. C. Kiricuta/Limburg	
Head and Neck Cancer Recurrence Re-Irradiation with Two-Step Intensity Modulated Arc Therapy	89
U. Götz and I. C. Kiricuta/Limburg	
Target Volume Selection and Delineation in Breast Cancer Conformal Radiotherapy	93
I. C. Kiricuta/Limburg	
Arc Therapy Following Breast Conserving Surgery or Mastectomy in Breast Cancer	125
U. Götz and I. C. Kiricuta/Limburg	
Conformal Radiotherapy: Hybrid-Technique After Breast Conserving Surgery for Breast Cancer	129
U. Götz and I. C. Kiricuta/Limburg	
Quality Assurance for Target Volume Conformal Radiotherapy	135
B. Schicker/Koblenz, I. C. Kiricuta and U. Götz/Limburg	
Selection and Delineation of the Target Volume for Apparently Localized Prostate Cancer Based on Surgical Experience	143
I. C. Kiricuta/Limburg	
Planning Target Volume Definition for Prostate Cancer	159
M. Flentje/Würzburg	
Conformal Therapy for Prostate Cancer	167
U. Hädinger and O. Kölbl/Würzburg	
Target Volume Definition for Lung Cancer	185
I. C. Kiricuta/Limburg	
Conformal Therapy for Lung Cancer	205
F. J. Schwab and I. C. Kiricuta/Limburg
